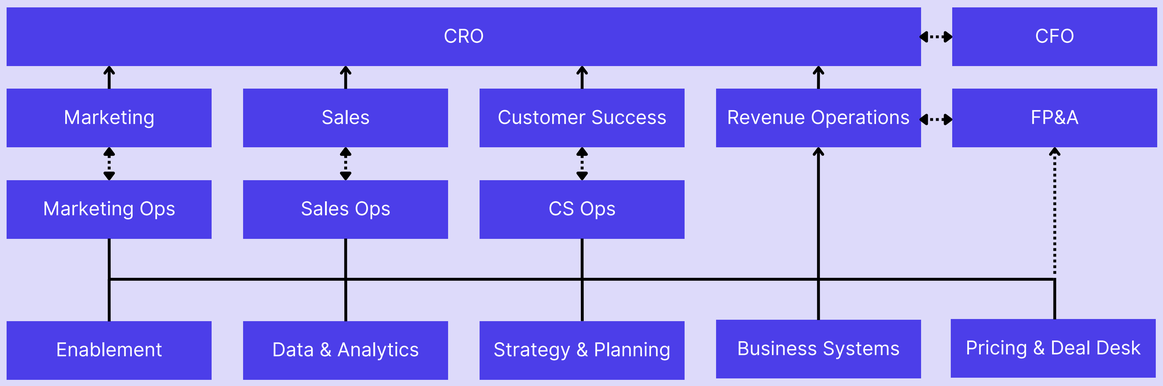
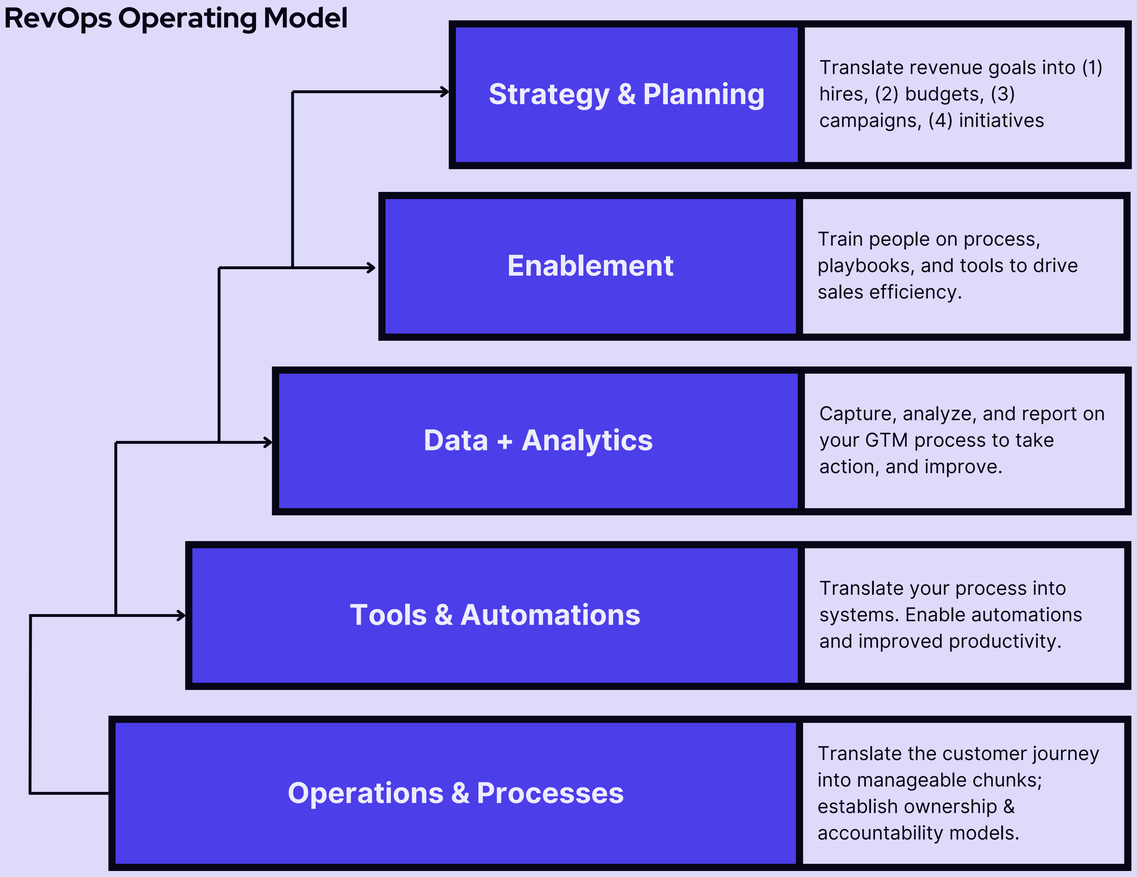
RevOps Cheat Sheet

RevOps in GTM team



RevOps Operating Model



RevOps Maturity Models

Maturity	Stage	Size	Goals	Priorities
Greenfield	Seed to Series A	20-50 FTEs	Measure the customer journey end-to-end.	• Cross-team alignment • RevOps roadmap • First Ops person (hire/ part-time)
Awareness	Series A-B	50-120	Build the basis for efficient & predictable growth.	• Break silos • Establish frameworks • End-to-end KPIs
Optimization	Series B-C	120-250	Establish RevOps function as strategic function	• Improve predictability • Drive efficiency • Analyze gaps to revenue
Strategy	Series D+	250+	Build out RevOps team	• Handle RevOps complexity • Advanced data analytics • Support strategic initiatives

RevOps Education

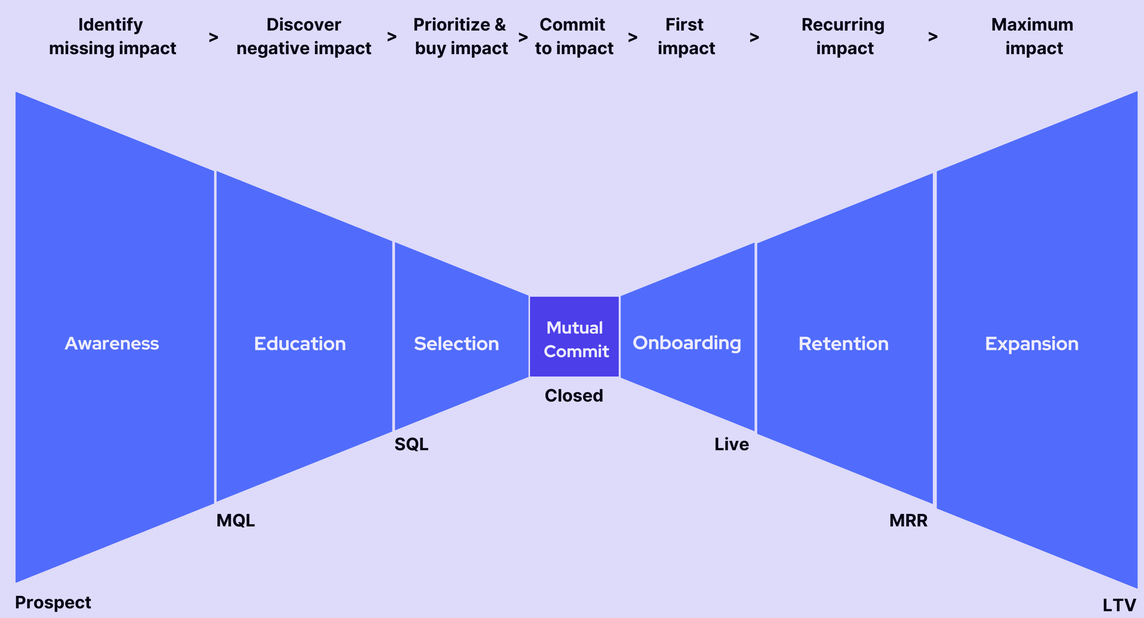
- GTM reports by ICONIQ, Bessemer, Index, etc.

Job

- Tackle new projects
- Learning by doing
- Ask peers
- Get a coach

Bowtie Model

Winning by Design



GTM metrics

Metric	Definition	Formula	Benchmark
YoY ARR Growth	Annual percentage change in ending ARR	Ending ARR - Starting ARR / Starting ARR	< 10M: 100% 10-50M: 30-80% 50M+: 20-60&
CAC Payback	Number of months it takes to earn back the money invested in acquiring customers	CAC / Current period new ARR	12-16 months
LTV/ CAC	Lifetime value of a customer is higher or lower than the marketing and sales costs to acquire that customer	LTV / CAC	3:1
Net Revenue Retention	measure the growth or contraction of their existing customer revenue base over a specific period, after accounting for upgrades, downgrades, and churn.	Starting ARR + Expansion ARR - Downsell ARR - Churn ARR / Starting ARR	World-class: 140%+ Great: 120%
Gross Revenue Retention	Ability to retain customers and maintain revenue, excluding expansion revenue from upsells, cross-sells, or upgrades.	Starting ARR - Expansion ARR + Downsell ARR / Starting ARR	World-class: 95%+ Great: 90%+
Win Rate	How many opportunities are actually converted by the sales team.	Closed Won opportunities / SQLs/SAOs (last stage before closed won)	<25K ACV: 15-20% 25-75K ACV: 20-25% >75K ACV: 25-30%
Average sales cycle	Average duration it takes for a sales opportunity to move from the first interaction or contact with a potential customer to the closing of a sale.	Sum of the Sales Cycle Duration for All Deals Closed / Number of Deals Closed	<25K ACV: 1-2m 25-75K ACV: 3-4m >75K ACV: 4-18m
Pipeline Coverage	How many clients there are in the pipeline that can be converted, relative to quota (inversely related to Win Rate)	Open Pipeline for given period / Remaining quota for period	<25K ACV: 2x 25-75K ACV: 3x >75K ACV: 4x
Ramp time	New FTE's time to full productivity (carrying a full quota). Tends to be higher for AEs in companies with higher ACV.	Time to Full Productivity (i.e. carrying a fully ramped quota)	<25K ACV: 3-6m 25-75K ACV: 6-9m >75K ACV: 9m+
% of reps hitting quota	Share of sales reps that achieve their quota.	# Reps hitting quota / Total # Reps	50-60%
Quota over assignment	Sum of quotas deployed to the team relative to revenue planned by the board. Over-assignment helps achieving target, but might demotivate sales reps.	Total Quota Deployed / Board Plan	15-20%
